# LICHTTRUNKEN - SOME WORDS

Welcome to Lichttrunken, the world of Claudia and her team of amazing assistant photographers and two independent wedding videographers.

From day one, photography has been more than a passion; it has been a life-changing experience. My journey with destination weddings had allowed me to connect with numerous love stories, people, and cultures, enabling me to capture breathtaking stories and weddings all over the world. No distance has ever been too long or too challenging.

I believe every wedding is a little cosmos, and it is my task to feel it, experience it, and transform the photography and videography of the wedding day into something memorable - into art that deeply speaks about the cosmos and its connections.

I believe in reliving the wedding again and again through pictures and films in a way that transcends mere memories. I offer a holistic experience from the beginning of our journey together.

My art is an unprecedented blend of documentary and editorial styles, making it elegant, modern, timeless, and cinematic. I specializes in romantic and cinematic weddings, catering to couples who want the extra touch, the easygoing feel of documentary style, and the elegance of editorial photography.

This passion for photography permeates my mind, and I only embarks on a personal journey of creating and capturing moments. Whether traveling for weddings, love, or personal reasons, it has always been and will continue to be my most excellent source of inspiration.
