## ABOUT OUR PRINTING METHODS:

### Foil stamping

Foil stamping is a technique that stamps your logo in metallic foil onto the napkin, using a custom metal plate. It's the perfect option for those looking to add a touch of elegance to their branding. Foil stamping is limited in its choices of foil colors, but has a real metallic finish & add depth and texture to the napkin.

### Full color digital printing

Digital printing is great for full color logos with a lot of detail. No plates are required, which ensures swift turnaround time.

### Embossing / Debossing

Embossing and debossing does not involve imprinting with any colors at all – rather, it is simply making an indentation (debossing), or “outdenting” the paper napkin (embossing). This method tends to be more soft and delicate- perfect for an elegant affair.

### Embroidery

Your custom logo, embroidered on a linen cloth napkin.

### Screen printing

Your custom logo, printed in full color on a linen cloth napkin. Screen printing offer more variety of ink color choices. This method is used to create an exact Pantone color match.

### Full color heat transfers
