1 item, \$185/item **\$185**

Silent Disco

What Is Silent Disco

Silent Disco is a unique and intimate dance party experience. The guests of the party will have wireless headphones in which audio is transmitted. These headphones have the option of having up to 3 channels (recommended for a truly customizable experience). Each channel will transmit a different station for guests to dance all night long. Silent Discos are a great way to get a truly unique and exciting experience while having no external sound for neighboring venues or events.

How It Works

The wireless headphones can be set up for 1, 2, or 3 channels. Each channel will provide its own individual experience, I recommend using all 3 channels for the full experience. 1 transmitter for each channel will be needed in order to operate. The first channel is set up with a Live DJ set, this allows the DJ to read the crowd and transition through songs to keep the party moving. Each additional channel is completely customizable. I will either provide playlists for these channels which consist of classics, oldies, and top hits, or you can create playlists for these channels to include some of your favorite music

Silent Disco

Includes headphones for each guest with 3 channels; 1 live DJ, 2 playlists.
You may also add to the package from the Al La Carte Ceremony and Cocktail hour packages.

Quantity:

\$0
